

AMENDMENTS TO THE SPECIFICATION

A substitute specification is attached hereto.

Please amend the Abstract as follows:

~~The invention provides a A method, computer program and system by which for producing a production schedule for a bakery is produced. The method involves reducing dough wastage by calculating a weight of dough for each bakery product which falls short of a full batch and combining that weight for the various bakery products formed from the same dough type to form batches comprising a whole number of bags of flour. This avoids the partial use of a bag of flour and reduces dough wastage.~~

A new abstract is appended hereto as a separate page.
